← Grease fittings are protected on the inside of the dolly body

All New Collins SLZ High-Speed® Dolly Features and Benefits:

The 2016 Collins SLZ Hi-Speed Dolly has over 25 dynamic design improvements!

Recessed bolt heads are flush with the dolly surface for a more attractive finish

- Safety ratchet system to help prevent accidents
- Load bearing pivot points run through the dolly body, and welded end caps for added strength
- Simplified, streamlined and stronger!
- All critical dolly parts are cut by laser to ensure precision
- Release handle now runs full length which gives it greater strength

Two-tone **zinc plating** is standard on all steel components. This gives improved resistance to salt corrosion and winter chemicals. Rail Ends are single-piece construction

- Two-tone zinc plating is standard on all steel components giving improved resistance to salt corrosion and winter chemicals
- Rail ends are single-piece construction
- Most serviceable dolly around - easily replace components on the spot
- Recessed bolt heads are flush with the dolly surface for a more attractive finish
- Grease fittings are protected on the inside of the dolly body
- Laser-Scribed for easy identification
