INTRODUCING THE

WHAT IS DRIVELINE BUDDY?

Driveline Buddy is a convenient and hassle free tool to secure the driveline of a truck. Instead of needing to completely uninstall a driveline, the handy tool allows towers to easily and quickly secure the driveline when towing.

EXCEEDING EXPECTATIONS

Original manufacturers, David and Kim Barton, took great care in developing each Driveline Buddy by hand out of their shop in Stockton, California. B/A Products will be taking over the production process in Columbia, Maryland keeping the original quality and craftsmanship that the Barton's originally intended for their product.

DAVID & KIM BARTON, Stockton, California

WHAT WILL YOU GET?

Everything you need to safely and successfully detach your truck's driveline without removing it entirely and keeping it secure is included.

Suspender Bar, Cradle, Rope Ratchet and T-Bar

Part #: 51-DLB-1
