

# GUARDIAN ANGLE™

ANOTHER GREAT NEW INNOVATION EXCLUSIVELY FROM B/A PRODUCTS CO.

### The Guardian Angle™ is designed to do several things:

Provide reinforcement to the corners of trailer or box trucks when uprighting over turns with synthetic web slings (flat or round).

Provides a smooth surface for synthetic web slings to contact and slide allowing the strap to “find home” when tension is applied reducing the possibility of the strap catching on the 90 degree edge of your typical aluminum angle and rolling it away from the trailer. The rounded edge also helps to eliminate cut and torn straps.

Aluminum construction is light weight and non-sparking.

The large radius of the outer tube spreads the load per square inch transmitted to the strap over a larger surface area, which allows the straps to more closely reach their Minimum Break Strength and Work Load Limit.

6" x 6" angle fits over corners better than 3"x 4" or 3.5" x 5" angles.

Safety Catch Strap and ratchet included, to keep angle from falling and causing property damage or injury.

Part#	Description
45-3A24	24" Guardian Angle™ w/Catch Strap
45-3B42	42" Guardian Angle™ w/Catch Strap
45-3R6	1" x 72" Catch Strap for 45-3A24
45-3R8	1" x 96" Catch Strap for 45-3B42

Safety Catch Strap also doubles as a carry handle.
