NEW LINE EYEZ FROM B/A!

LINE EYEZ SAVE LIVES!

Line Eyez are the newest innovation in Safety from B/A Products Co!

Highly visible/easily attachable reflective markers made in **6 distinctive colors** that can be used for a variety of tasks.

How they are used:

- **Marking of winch lines** going overtop of roadways. This allows for greater visibility so that all vehicles (especially vulnerable motorcyclists) can better see and avoid intruding into your accident scene or similarly dangerous situation.
- **Color code your winch cables** to the correct winch control handle making identification a snap. The reflective markings are especially important in low light areas and areas with reduced visibility.
- Using Air Bags? **Color code your air lines** to the correct air control valve, saving you time, effort and the frustration of having to search through all of your lines to find the one you are looking for! Will work on hoses up to 1" in diameter.

Red	Part# 4-LER	Green	Part# 4-LEG
White	Part# 4-LEW	Orange	Part# 4-LEO
Blue	Part# 4-LEB	Yellow	Part# 4-LEY
