

11-608 Start•All® with Air Compressor and AC Generator

11-608 Start•All with Air Compressor and AC Generator

The 11-608 is a compact 3-in-1 Start•All® combining the jump starting capabilities of an 11-605 with an AC generator and an air compressor. Ideal for the mobile service mechanic, providing a single source solution for multiple power applications.

Output

12 volt, 450 amp, 13 CFM @ 100 psi, 150 psi max

Dimensions

31"W x 25"D x 26"H, 450 lbs.

Engine

Electric start, air cooled Briggs & Stratton Vanguard OHV gasoline engine with 2 gallon fuel tank

Cables & Clamps

30 ft., 1/0 ga. welding cable allows flexibility and ease of use, 1000 amp full-power clamps allow higher amperage flow

General Features

- Electric start, air cooled Briggs & Stratton Vanguard OHV gasoline engine with 2 gallon fuel tank
- Single stage air compressor, 13 CFM @ 100 psi, 150 psi max. Air tank required, sold separately.
- 2750 watt AC generator, 1 duplex 120 volt, 20 amp outlet
- 30 ft., 1/0 ga. welding cable allows flexibility and ease of use
- 1000 amp full-power clamps allow higher amperage flow
- Volt and amp meter to monitor boosting output
- Voltage Control provides regulated voltage that is safe for vehicles and on-board electronics
- Reverse Current Shutdown Protection eliminates expensive repairs to the Start•All® if the unit runs out of gas
- Reverse Polarity Protection will not allow the Start•All® to be turned on if the cables are not hooked up correctly
- Polarity and low battery LED indicators confirm proper connections
- Anti-zap surge protection provides safer boosting
- Single DC boosting switch for easy operation
