

Vehicle-Mounted CapStart

Powerful, maintenance-free, capacitor-powered jump starting

Want to start an M1 Abrams tank? Thirty heavy duty Caterpillar dozers in below-zero temperatures? How about twenty transit buses on a bone-chilling morning? The Goodall® CapStart generates over 3000 amps of power to jump start just about anything quickly.

Narrow 20" width to easily fit between parked vehicles

Vehicle Mounted CapStarts

- Part # 13-095-1012 Volt
- Part # 13-097-1024 Volt

Dimensions

44"W x 20"D x 14"H, 250lbs.

Product Description

Powercells are charged by the vehicle's electrical system or by the built in 120 volt AC fully automatic charger.

- Powercells are non-gassing, non-leaking, and maintenance-free
- Operating temperature range: -49°F to +122°F
- Quick-disconnect red plug for plug-to-plug operation
- Includes reverse polarity and dead short circuitry protection

Cable & Clamps

- Includes full-power jaw clamps with 26 ft. of 4//0 cable
- Activation switch with 30 ft. cord

Output

Available in 12 or 24 volt models

Recharge

Capacitor can be re-charged 500,000 times providing many years of services and can be recharged in under one minute

Replacement Powercells

- Part # 880-05812 Volt
- Part # 880-01724 Volt
