

67-310D Generator 6000 Watt Diesel

Product Description

The Goodall® diesel generator uses only the highest quality components including the powerful Yanmar engine. Known for their long life span, diesel generators typically have lower operating costs and run nearly smoke free.

Engine

- Low oil shutdown
- Heavy duty frame
- Idle control
- 9.2 HP Yanmar engine with electric start

Alternator

- Total harmonic distortion (THD) less than 5%
- 100% copper windings
- Brushless 120 volt/240 volt alternator

Frame

- Heavy duty wrap-around frame with 1" powder coated steel tubing
- Low profile, compact design
- Angled isolator design features for neoprene isolators

Accessories

- 67-429 Lifting Hook
- 67-430 Wheel Kit

Components

- Large low-tune mufflers to reduce noise to lowest level
- Easy access and protected control panel with magnetic circuit breakers and GFCI protected receptacles
- Gas shut-off valve
- Heavy duty industrial air cleaners hold up under extreme conditions
- Easy-to-read gas gauge and voltmeter/hour meter
- Full power switch
- Fuel tanks are powder coated outside, zinc-plated inside to prevent rusting
- Large fuel tank capacity for extended run time

Miscellaneous

- USDA/USFS approved spark arrestors
- Circuit breaker protected
