

## TIPS

Before each use, perform a thorough inspection of the unit and all accessories (Dolly, Straps, Break-over Bar, and Axles).

### Inspect the following:

- Cam locks fully engage and the handle is threaded tightly. If loose, use blue locktite.
- Evidence of physical damage such as bending and cracking
- Deformation of plates and welds
- Cracking or flaking of powder coat or paint
- Deterioration of spindle bushings and pivot pins. If they have deteriorated, replace them.
- Axle snap buttons have been fully engaged.
- Loose rivets or missing end caps from the dolly axles.
- Tire pressure is at the recommended pressure listed on the tire side wall.
- Tie-downs for frays, kinks, and defects. Replace immediately if any damage exists.
- Break-over bar deformation. Replace if necessary with a break-over bar from ITD.

**CAM LOCKS**

**SPINDLE BUSHINGS & PIVOT PINS**

**BREAK-OVER BAR**

**AXLE END CAPS**

**ENGAGED**

**DISENGAGED**

**AXLE SNAP BUTTONS**
