

# Brisk Cooling Shoulder Insert

1620 Lime

Add a  
**Brisk Cooling  
Shoulder Insert**  
to any vest

• APPLIED BY ML KISHIGO •

## PRODUCT BENEFITS

- \\ Promotes comfort and endures safety in high heat conditions.
- \\ Provides extended cooling comfort and heat stress prevention.
- \\ Lightweight, durable and reusable.
- \\ Activated by simply submerging in water.
- \\ Cooling lasts for 5-10 hours & can be re-activated by re-submerging in water.
- \\ Simple and easy to use.

SIZES: M-XL, 2X-5X

Fully removable cooling pad.

Hook &amp; loop for easy removal.

1. Submerge in clean water for 1-2 minutes.
2. Wipe off excess water.
3. Re-activate as needed.

# Brisk Cooling Technology

HyperKewl™ Evaporative Cooling products utilize a unique chemistry to achieve rapid absorption and stable water storage. The chemical formulation also creates enhanced evaporation. Our HyperKewl™ fabric combined with our three-layer design helps to cool the user while they stay dry!

## EVAPORATIVE COOLING TECHNOLOGY

- \\ Specialized fabrics and fibers create an advanced water management system, called 'HyperKewl'.
- \\ HyperKewl absorbs, stores and releases water within the multi-layered structure.
- \\ The fabrics cool itself through evaporation and a chill effect is created.
- \\ Users can expect the evaporative cooling fabric to provide temperatures that are up to 15-20° cooler than the ambient temperature.
