

EMERGENCY WARNING LIGHT BAR

SAE & DOT CLASS 1 • ECE R65 • ECE R10

TOWMAN'S HOOKER™

The slim-profile warning bar for tow, recovery, DOT and utility trucks — 22 LED heads, 14 flash patterns, and the only STT section in the market that flashes amber and switches to red on the brakes.

DUALUX™ — ALT ONLY

The STT section flashes amber, then switches to red the moment the brakes are applied. No competitor offers it.

NO BLACK SPOT

With the STT or work lights off, amber still flashes across the full bar. No dead segments, no gap in the warning signal.

LOWEST PRICE IN CLASS

Lowest-priced bar of its kind on the market, new trucks or used, backed by a 5-year warranty.

SELLING POINTS

- **22 LED heads plus dual STT.** Front and back coverage on the 60" bar for maximum on-scene visibility.
- **Fast-select arrow function.** One touch for "move over" compliance and high-visibility lane direction.
- **Epoxy-encapsulated flasher boards.** Sealed against weather and vibration, with no exposed circuit boards anywhere in the bar.
- **17 ft labeled cable.** Every wire tagged by function, so the installer is not guessing.
- **14 flash patterns built in.** Selected from the dash switch or the optional wireless controller.
- **Wireless controller shows the active pattern.** USB powered with LED display and backlit keys; runs on 4×AAA if preferred.
- **Sunlight-blocking black top.** Blocks overhead sun so the output reads brighter in daylight.
- **5-year warranty.** Premium build at an affordable price, and the warranty to back it.

TOWMAN'S HOOKER™ and TOWMAN™ are trademarks of ALT Enterprises.

LIGHT BARS
