

SMARTER CAPTURE

PART NUMBER: SV-LCD43M-KIT

SV HARDWARE

COLLISION AVOIDANCE MIRROR MONITOR

43M

The 43M Mirror Monitor offers a unique collision avoidance solution by integrating a 4.3-inch monitor inside a typical rearview mirror. This innovative arrangement saves space in otherwise cramped vehicle interiors as well as increases safety by placing the rearview image where most drivers look by instinct.

With the 43M Mirror Monitor, there is no additional rear vision monitor to mount in the cabin. The 43M simply replaces the existing rearview mirror. This places the monitor where most drivers instinctively look and increases safety by eliminating any obtruding objects in the cabin.

The LCD screen turns on and appears automatically when the vehicle is placed in reverse while an anti-glare surface ensures a clear view.

FEATURES

- Two camera inputs with switchable camera views
- Parking distance grid lines help guide backing maneuvers
- Integrated control box ensures clean and easy installation
- Up to two sensors automatically trigger the display of alternative camera views
