

SIMPLE MOUNT

The Simple Mount is a great, low cost way to hold your Speed® Dolly or XD™ Dolly. The Simple Mount is available in a Standard and Short version Simple Mount for the Speed® Dolly and a Standard version for the XD™ Dolly. The Short Simple Mount allows the tires of the dolly to rest on the deck. Lock by running pad-lock through eyelet on top of mount after Speed® Dolly is placed in the mount. The mounting platform on the Integrated Speed® Mount, Speed® Mount and Simple Mount is identical for easy installation and upgrade. Sold as each.

INSIDE *In The Ditch*

Meet "Sparky" our Robotic Welder

Our Lincoln Electric Robotic welding cell offers great advantages over manual welding. The automated cell allows the operator to change parts while maintaining arc on time, with typical increases in production of 30% - 40% over manual welding. Combine increased production with added consistency and the robotic welder ends up being an invaluable tool for In The Ditch.
