

Trailer Ramps

BAN THE BOARD

RR-TR-8XL

All trailer ramps use Brute Technologies' patented super lightweight design with a 100% solid construction to ensure the ramps are highly durable, anti-skid, and very stable—with the ability to support a 6,000 lb. vehicle. The ramps' textured coating prevents sliding and won't scratch or otherwise damage floors. Trailer ramps are lightweight and have built-in straps for easy transport and hanging on a wall. They are easy to clean and won't rust.

Advantages of Trailer Ramps

- Patented design provides a lightweight alternative to steel and lumber
- Lower approach angle resolves service and loading problems
- Load Porsches, Corvettes, and other low profile cars without doing damage
- Will not damage trailer doors or trailer
- Supports 1,500 lbs per ramp or up to a 6,000 lb vehicle
- Other sizes and customized trailer ramps available
